## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the feature of "a detector for detecting whether the information transmitted from the user terminal contains area information or not" in combination "retrieving position information on the area information from said position information database when it is detected that the e-mail contains area information". The claims in the application are deemed to be directed to a non obvious improvement over the invention of Hirono in view of Gough et al. " When the e-mail server determines whether a transmission request has been made by a terminal or a portable terminal the e-mail server S1a accesses the e-mail database S1b and reads the e-mails corresponding to the e-mail address of the terminal T1 or portable terminal T2 that has made a transmission request. Further, the e-mail server detects the display format that can be processed by the terminal or portable terminal that has made a transmission request and determines whether the detected display format differs from the display format of area information of the e-mail read from the e-mail database" (See page 4, paragraph [0058-0059]).

The limitations in light of the cited section of the specification emphasizes the Applicant's argument that in contrast Hirono teaches "a system wherein the map home page server executes a program for drawing a map corresponding to the request from the user terminal and the created image data is transmitted to the user terminal which displays the image map data as the map image 44" (See page 5, paragraph [0078]). The Applicant's argument is persuasive in

suggesting that Hirono teaches the opposite of the claimed invention and cannot possibly teach that the user terminal transmit the map image data to the map home page server or that the map home page server detects whether the request transmitted from the user terminal contains the map image data (See appeal brief, pages 18 and 19).

Therefore, the application is allowable for the reasons cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
